High Density Polyethylene

Iran (Islamic Republic of Iran)

Jam Petrochemical Company

None

Plastic bottle, Corrosion Resistant pipe and tubing, cable coating, Blow molded packaging, medical packing, adhesive ...

Manufacturer subcontractor:

Emergency phone number: Contact email:

Fax:

Association/Organization:

Use of the Substance / Preparation:

2. COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous substances:

Hazardous label(s):

Not applicable, Inert substance.

This product is not hazardous

Toxicological characteristics: This product is not toxic.

Substances present at a concentration below the

minimum danger:

Within the present knowledge of the supplier, this product does not contain any hazardous ingredients in quantities requiring to report in this section, in accordance with EU or national regulations.

Other component: None

3. IDENTIFICATION OF HAZARDS

Risk phrases: Stable product. It doesn't offer hazard in

its normal handling and storage state.

Negligible hazard at ambient temperatures

Skin contact: Negligible hazard at ambient temperatures (-18 to +38 degrees C; 0 to 100 degrees F).

Exposure to hot material may cause

thermal burns.

Eye contact: Particulates may scratch eye surfaces /

cause mechanical irritation.

According to the Directives 91/155/CEE-2001/58/CE-ISO 11014-1

Revision Number: 1

Page: 2 of 8

Health

Product Name:

HDPE High Density Polyethylene

Inhalation:

Dust may cause mechanical irritation. Negligible hazard at ambient temperature (-18 to 38 Deg C; 0 to 100 Deg F) Vapors and/or aerosols which may be formed at elevated temperatures may be irritating to eyes and respiratory tract.

Minimal toxicity.

Product not classified as hazardous by

UNO.

If swallowed:

Other information:

4. FIRST AID MEASURES

As a general rule, in case of doubt or if symptoms persist, always call a doctor **NEVER** induce swallowing in an unconscious person.

Skin contact:

Wash skin with soap and water. For hot product, immediately immerse in or flush the affected area with large amounts of cold water to dissipate heat. Cover with clean cotton sheeting or gauze and get prompt medical attention. No attempt should be made to remove material from skin or to remove contaminated clothing, as the damaged

flesh can be easily torn. In case of adverse exposure to vapors and/or aerosols formed at elevated temperatures, immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Keep at rest.

Call for prompt medical attention. This product is an inert solid. If in eye, remove as one would any foreign object. Rinse with plenty of running water. Obtain medical attention if symptoms occur.

There is no known acute effect after over-

exposure to this product.

If swallowed, rinse mouth with water (only if the person is conscious). Obtain medical

attention if symptoms occur. Do not induce vomiting.

In case of exposure by inhalation:

In case of splashes or contact with eyes:

In case of swallowing: Note of physician:

According to the Directives 91/155/CEE-2001/58/CE-ISO 11014-1

Product Name:

HDPE High Density Polyethylene

Revision Number: 1

5. FIRE FIGHTING MEASURES

Flammable class:

Suitable extinguishing media:

Special exposure hazards arising from the substance or preparation itself, combustion products, resulting gases:

Special protective equipment for fire fighting:
Other information:

6. ACCIDENTAL RELEASE MEASURES

Flammability Risk 1 (Slight)

Use water spray to cool fire exposed surfaces, protect personnel, and extinguish the fire. For small fire, use dry chemical or CO2. For large fire, Use dry chemical powder or alcoholresistant foam.

In case of fire, may produce hazardous decomposition products such as carbon monoxide, carbon dioxide, (dense) black smoke, aldehydes, and Organic acids. Respiratory and eye protection required for fire fighting personnel. Solid material, may burn at or above the flashpoint, and airborne dust may explode if ignited. If thermally decomposed, flammable/toxic gases may be released. Toxic gases will form upon combustion. Static Discharge, material can accumulate static charges which can cause an incendiary electrical discharge

Personal precautions:

Environmental precautions: Methods for cleaning up and disposal:

Other information:

Avoid creating dusty conditions and prevent wind dispersal. Use suitable protective equipment .Keep away from sources of ignition. Take precautionary measures against static discharges. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. No special measures required. Small spill and leak - Vacuum or sweep up material and place in a designated lapelled waste container. Clean up affected area with a large amount of water.

Large spill and leak - Use explosion-proof electrical (ventilating, lighting and material handling) equipment.

Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. Recover the spilled material and place in suitable containers

According to the Directives 91/155/CEE-2001/58/CE-ISO 11014-1

for recycle or disposal.

7. HANDLING AND STORAGE

The	regulations	relating to	storage	premises	apply to	workshop	where th	e product	is ha	ndled

Handling:	Use with adequate ventilation. Local			
	exhaust ventilation should be provided.			
	Avoid creating dusty conditions and			

prevent wind dispersal. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Take measures against static discharge. Keep away from

sources of ignition.

Storage: Store in a fireproof location. Keep away from incompatible materials and avoid

specific conditions. Containers should be grounded. Take precautionary measures against electrostatic discharges. Do not

stack more than 2 pallets high in

connection with risk of falling over. Do not stack pallets with grades containing slip or Anti-Block (AB) additives. Protect from

(sun) light. Keep in a dry place.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure limit values: 5 mg/m3 (respirable dust), and 10 mg/m3

(total inhalable dust) based on the OSHA PEL for nuisance dust. The recommended permissible exposure levels indicated above reflect the levels revised by OSHA in 1989 or in subsequent regulatory activity. NPC recommends that the lower exposure levels

be observed as reasonable worker

protection.

Exposure controls: Local exhaust ventilation of process

equipment may be needed to control particulate exposures to below the recommended exposure limit.

Personal protective equipment: For open systems at ambient temperature (-

18 to 38 degrees C) where contact is likely, wear safety glasses with side shields. Where contact may occur with hot material, wear thermal resistant gloves, arm protection, and

According to the Directives 91/155/CEE-2001/58/CE-ISO 11014-1

a face shield.

Safety glasses with side shields. Wear dust protection mask P2.

When handling hot material, wear heatresistant protective gloves that are able to withstand the temperature of molten

product.

Working clothes.

Not available

Plastic pellets are defined as a "significant material" which requires any industrial plant that may expose pellets to storm water to secure a storm water permit. Violations of the rule carry the same penalties as other

Clean Water Act violations.

9. PHYSICAL AND CHEMICAL PROPERTIES

General information:

Appearance (at 20°C):

Colour: **Odour:** PH (at 20°C):

Freezing /Melting point (°C): Boiling point/range (°C):

Flash point (°C):

Flammability:

Auto-ignition temperature: Explosive properties:

Oxidising properties: Vapour pressure (at 20°C):

Density (at 20°C):

Solubility (at 20°C):

Viscosity (40°C):

Evaporation rate:

Other information:

None

Solid. (Granular solid. Powder.)

Off-white.

Wax-like when heated

Not applicable.

Decomposes. >300 °C

>343 °C

Flammability Risk 1 (Slight)

> 330 °C None None

Not available

0.941 to 0.97 g/cm3

water solubility: Insoluble in cold water

solubility in fats: Insoluble

Not applicable Not applicable

Insoluble in almost all solvents at room

temperature; soluble in many organic solvents above 93 deg C; may "swell" by absorption of

solvents below 60 deg C

10. STABILITY AND REACTIVITY

Stable under recommended storage and

handling conditions

Temperatures over 650 F (343 C) will lead to resin degradation and decomposition. Keep

Stability:

Conditions to avoid:

According to the Directives 91/155/CEE-2001/58/CE-ISO 11014-1

Revision Number: 1

Page: 6 of 8

Product Name:

HDPE High Density Polyethylene

Material to avoid:

Hazardous decomposition products:

away from heat, sparks and flame and exposure to (sun) light. Prevent formation of dust clouds. Take measures against static discharge. Avoid storage or contact with strong oxidizing agents. Fluorine Strong Oxidizing agents.

Highly dependent on temperature and environmental conditions, a variety of decomposition products may be formed, such as low molecular weight hydrocarbons and hydrocarbon oxidation products (acids, ketons, and aldehydes). Also thermal decomposition under condition of limited oxygen supply will give rise to carbon monoxide.

11. TOXICOLOGICAL INFORMATION

- LD₅₀, oral, rat (mg.kg⁻¹): >5000 mg/kg Acute toxicity:

- LD₅₀, oral, mouse (mg.kg⁻¹): Not Available

- LD₅₀, dermal (mg.kg⁻¹): Not Available

None

Sub chronic – chronic toxicity: Sensibilization: Not available

Carcinogenicity: Carcinogenic effects are not known. **Reproductive effects:** Reproductive effects are not known.

Human experience: Not available

Other information: During heating and processing of the material small amounts of free monomer may evaporate resulting in airborne concentration that may cause irritating effects of the respiratory tract

and nausea.

12. ECOLOGICAL INFORMATION

Ecotoxicity: No specific ecological data are available for this

product.

Bioaccumulative potential: Effects on nature due to bioaccumulation are

not known.

Mobility: No specific ecological data are available for this

product.

Persistence and degradability: No specific ecological data are available for this

product.

Other adverse effects: No specific ecological data are available for this

product.

According to the Directives 91/155/CEE-2001/58/CE-ISO 11014-1

Product Name:

HDPE High Density Polyethylene

13. DISPOSAL CONSIDERATIONS

Disposal of product: Waste must be disposed of in accordance with

national and local environmental regulations.

Disposal of packaging: Polyethylene bags should be reused in the

working area, products transportation or recycled by specialized companies.

14. TRANSPORT INFORMATION

Land transport:Not establishedADR/RID:Not establishedPackaging group:Not applicableMaritime transport:Not applicableAir transport:Not applicable
